

TANK NAME PLATES

The **Preferred** tank name plates are durable 1/8" thick cast-bronze plates with polished 1/16" high raised letters. They are used to permanently identify fill, sounding and vent terminals for underground storage tanks. This is especially important when adjacent tanks contain different liquids. Standard plates are approximately 3" x 6" with 3/4" or 1" letters depending upon the markings used. (Special sizes and markings are available - contact us for information.) Two (2) 1/4" diameter holes are provided for permanent fastening to any flat surface.

Suggested Specifications

Each storage tank fill, vent and test line terminal shall be suitably identified by a one piece cast bronze nameplate approximately 3" x 6" with polished raised letters as furnished by Preferred Utilities Mfg. Corp., Danbury, CT.

Ordering Information

Select from the standard markings below:

Annulus Space	Fuel Oil Tank No. 2	Test Well Tank 3
Diesel	Fuel Oil Tank No. 3	Turbine Oil
Diesel Fill	Fuel Oil Tank No. 4	Unleaded Gasoline
Diesel Fuel	Gasoline	Vapor Recovery
Diesel Fuel Fill	Gasoline Fill	Vapor Return
Diesel Fuel Sounding	Heating Fuel	Vent
Diesel Oil	Heating Oil	Vent #1
Diesel Oil Fill	Heavy Oil	Vent #2
Diesel Oil Tank No. 1	Kerosene	Waste Oil
Diesel Tank No. 1	Light Oil	Waste Oil Do Not Fill
Diesel Tank No. 2	Manual Transmission	Water
Diesel Tank No. 3	No. 2 Oil	
Diesel Tank No. 4	No. 2 Fuel Oil	
Emergency Gen.	No. 6 Fuel Oil	
Emergency Gen. Fuel Oil Fill	Sounding Line	*Contact factory for non-standard markings.
